

Trinity Academy
Technology Plan
2006-2009

Goals and Objectives:

1. To provide students and staff with updated and functional equipment and improve upon existing hardware.
 - To work with the technology team to develop and complete a needs assessment in each classroom to determine specific needs at each grade level.
 - To determine the order of replacement for staff computers.
 - To complete grant applications for technology through the Hudson Education Foundation, Best Buy, and other local funding sources.

2. To use technology as a tool for communication to parents, the community and amongst staff.
 - To continue to work with staff to update and manage the school web site.
 - To work effectively with the church to keep the web site updated.
 - Provide the school community with a tool to find information such as: school test data, forms, school calendar, registration information,

3. To engage students in integrated and technology enriched learning throughout a multitude of curricular areas.
 - To work with staff to investigate the state standards for K-5 technology.
 - To work with staff to develop technology goals and objectives for each grade level K-5.

- To purchase appropriate software for students such as a typing program and a program to support reading/and or math for the purpose of differentiation within the classroom.
4. To increase staff competence and effectiveness in the use of technology for the purpose of integrating technology into instructional practices, curriculum and improving data management.
- To work with software support to implement web pages for each teacher.
 - To provide opportunities for professional growth amongst staff for the purpose of data management and Microsoft word programs.
 - To provide opportunities for staff to observe technology in use in other school settings.
5. To use technology as a component of our Christian Mission to “Build Bridges and Connecting People to Christ”
- To work with staff to engage students in global connections.
 - To develop a CD that portrays who we are at Trinity Academy and to use this technology to further our mission at Trinity.
